SOCIETY POINTS.

There is every indication now that the society season this winter will be very gay. In addition to the usual hops to be given by the Assembly Ball Club, which will be re-organized at an early date, and the theatre parties, luncheons, card parties, receptions and teas with which most of the ladies in the social circle will entertain their friends, there were three euchre clubs organized this week, which with the whist club of last season to be re-organized within the next few weeks, will keep the devotees in a constant whirl of social pleasure. The names of the members of two of the euchre clubs were not obtained, but the following is the membership of the "Ladies Afternoon Club," which re-organized Tuesday afternoon at a meeting at Mrs. Sam. B. Holmes viz: Mesdames E. Polk Johnson, G. M. Adams, Caswell Bennett, D. B. Walcutt, Wm. H. Newhall, jr., Wickliffe Chapman, J. Swigert Taylor, Sam. B. Holmes, Lampton Price, Henry C. Murray, Sam. Blackley and Misses Jennie Morris and Maggie Taylor. Gentlemen are not admitted to the entertainments of this club, but they enjoy the rights of membership to other clubs which meet at night. The first meeting of the "Afternoons" will be held at the residence of Mrs. Walcutt next Wednesday.

A New Depot.

It is said that the visit of President M. H. Smith, of the Louisville and Nashville railroad, to this city this week, was for the purpose of looking over the ground and taking into consideration the petition of the Frankfort shippers and traveling patrons of the road who asked a few weeks ago for a new and commodious depot in this city. What result was reached by Mr. Smith has not yet been learned, but it is reported from a reliable source that he was impressed with the necessity for a better and larger depot both for the accommodation of the passengers and the shippers, and if room can be had at a reasonable figure in the vicinity of the present depot, either at the rear or across the street, to take in almost the entire block, it is believed that the road will enter upon the work of building a new depot without further delay.
